The New York court of appeals has given a decision sustaining the "one day-rest-in-seven" law that meets the strong approval of progressively minded citizens. The following sentences are worth quoting: "We have no power of decision of the question whether it is the wisest and best way to offset these conditions and to give employees the protection which they need, even if we had any doubt on that subject. Life is not merely to live, but to live well, eat well, digest well, work well, sleep well, look well. What a glorious condition to attain, and yet ow very easy it is if one will only adopt the morning inside bath. Folks who are accustomed to feel

breakfast, drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver, kidneys and bowels the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening and purifying the entire alimentary tract before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases, waste and acidity and gives one a spiendid appetite for breakfast. While you are enjoying your breakfast the water and phosphate is quietly extracting a large volume of water from the blood and getting ready for a thorough flushing of all the inside organs.

The millions of people who are bothered with constinution, bilious spells, stomach trouble, rheumatism; others who have sallow skins, blood disorders and sickly complexions are urged to get a quarter pound of limestone phosphate from any store that handles drugs which will cost very little, but is sufficient to make anyone a pronounced crank on the subject of internal sanitation.-Adv.

REMARKABLE ACHIEVEMENTS OF "SELF MADE" MEN.

Some of Those Who Have Pursued the Way to Riches and High Position Without Envying or Ill-Treating Others.

Newspapers of every great city constantly are telling the stories of selfmade men. We find presidents of railroads who began as switchmen, presidents of banks who began as messenger boys, publishers of prosperous newspapers who began as printers, heads of great enterprises in every direction whose beginnings were in the humble walks of poverty. Yet ranting demagogues on soap boxes at street corners are preaching the gospei of envy, dissatisfaction, unreason, unrest, 'Jasper" writes in Leslie's. The head of one of the successful

banking institutions in New York city gave a dinner to a few of his acsociates the other evening. He is a man of large wealth and of commanding influence in his line of enterprise. Courteous and cultivated, he bore the air of one who had begun life under advantageous circumstances. Yet, during the course of the evening, it was revealed that this man of great wealth had been a poor immigrant boy, who got his start in life by selling trifles from a peddler's pack under the burden of which he trudged through country towns, seeking his customers along the highways and byways. His industry and ambition made him so successful as a pack peddier that in due time he was able to hire a young man to go with him and carry a pack. Next he began to make his circult with a horse and wagon, then with a team of two horses, and finally with an outfit of two wagons, and thus, having accumulated the necessary capital, he was able to open a store, and from that to get into the manufacturing line. Step by step, he laid the foundation of his fortune, not envying the success of others, not seeking to pull anyone down, not interfering with any competitor's progress, but persistently and patiently following out his own plans and carrying them to the fruition of success What an inspiration there is in this example to the young men with no other capital but character, good health, industry and ambition. It is

to the secretary of state's office in Albany. N. Y., by the head of that department as his messenger. With a change wrought by politics, the office boy lost his job, but he did not lose his grit. On the morning of his dismissal he said to one of his associates "I got my blue envelope today." The friend inquired "What are you going to do" He received the quick response: "I am going to work." In a few hours the lad had found a place wrote the plays usually attributed to as messenger in the five and ten-cent store in Albany. He died the other day, leaving a large fortune, and at his death was vice president and treasgan to serve in the humblest capacity. Sixty years ago John D. Rockefeller went to work in Cleveland as an assistant bookkeeper, and for the first three months received only \$50 as his wages. The same story might be told of nearly all the eminently successful the story of achievement, of pluck, of independence courage and self-reliance. Let any one of my readers look about in his own community and he will find iffustrations in a large or

still a world of opportunity.

An orphan boy in 1890 was brought

Sir Humphrey Davy's invention was really the outcome of the terrible calamity at Felling colliery, County Durham, on May 25, 1812, when 92 miners were killed and many injured.
